WELCOME TO THE METAL MART FAMILY!

Metal Mart began in 1985 in Austin, Texas as a retail outlet for our parent company McElroy Metal, a third generation family owned business. That first store was a pole barn with dirt floors, but from our humble beginnings, we have grown to our current 44 locations across 5 states and most recently, became an ESOP (employee owned company). Our growth is a testament to our loyal customers, quality products and services, and our dedicated employees. Just as when Metal Mart began almost four decades ago, our goal remains the same: provide the highest quality materials, excellent customer service, and affordable pricing. We appreciate your business and look forward to working with you!

WHY CHOOSE METAL MART?

We believe that business morals and ethics still have a place in the work environment. We continue to conduct business under “The Golden Rule” adage: *Treat others the way you want to be treated.*

Our core values reflect this basic principle:

- **Commitment to Customer** - Great customer service is the first step in creating lasting impressions and relationships with all our customers; metal novice and professionals alike.
- **Fiscal Responsibility** - We strive to make every dollar count; not just in our day to day business expenses, but also for our customers by providing quality products and exceptional service at affordable prices.
- **Integrity Based Relationships** - We firmly believe that honesty and transparency build trust in all business relationships.
- **Value Team Members** - Every employee deserves to be treated with respect and appreciation.
- **Continuous Improvement** - No one is perfect; we aim to improve and learn every day.
- **Industry Leadership** - Good leadership creates inspiration to improve and grow, not just as a business, but as individuals.

Guided by these core values, we strive to be an industry leader who provides high-quality products and services while developing meaningful relationships with our customers, employees and suppliers. We aim to be your trusted metal supplier for many years to come!

OIL CANNING

Oil canning is defined as a visual waviness in the flat area of metal panels. Oil canning is an inherent property of all metal panels and is not cause for panel rejection. Many factors can contribute to the degree of oil canning including temperature, stress, improper installation and/or underlying structure. Choosing a heavier gauge steel or the addition of striations, minor ribs or planks between seams of concealed fastener panels can reduce the visual effect of oil canning. A signed oil canning acknowledgment is required for each order. See all available pan condition profiles and renderings on our website.

SLIT COIL & FLAT SHEETS

SLIT COIL

FLAT SHEETS

Metal Mart offers an extensive slit coil and flat sheet program. In fact, we're proud to have one of the most robust inventories in the industry. Choose from a wide selection of colors, gauges and widths. In stock flat sheets are available in a wide assortment of colors from your local Metal Mart store. Finish warranties up to 40 years are offered on all slit coils. In many cases we have less slit coil drop than many of our competitors and slit coil drops can be purchased for trim fabrication resulting in less waste and lower costs.

NEED MORE HELP?

Contact your local Metal Mart store for pricing, color/gauge availability and estimated turn-around times. Find a location near you on our website!

Options
Slit Coil Gauges - Standard 24 GA, 26 GA - Optional 22 GA
Slit Coil Widths - Standard 20", 21.875", 22", 24" - Other sizes can be custom slit - please inquire
Slit Coil Lengths - Custom Lengths - 200 LF minimum order (2 slit coil at 100 LF ea)
Flat Sheet Gauges - Standard 24 GA, 26 GA, 29 GA - Optional 22 GA
Flat Sheet Widths - Standard 41 9/16", 44 1/2", 48 3/8" - 29 GA is only available 48 3/8" (Select plants)
Flat Sheet Lengths - Standard length 10' - Other lengths - please inquire

ADDITIONAL PANEL INFORMATION

PANEL SYSTEMS: WHAT'S THE DIFFERENCE?

While the options may seem overwhelming, metal panels are available in two basic types of systems:

EXPOSED FASTENER

Exposed fastener panels are the most economical option, and can be installed over solid decking or open framing. These panels are attached with fasteners that penetrate through the panel into the structure below leaving the head visible after installation. Fasteners are available in colors to match the panels which help make them less visible.

CONCEALED FASTENER

Concealed fastener panels are considered an upgrade from exposed fastener panels, and they are traditionally more expensive. They are joined together by integral locking seams that are fastened to the deck with fasteners and/or clips hidden underneath the panels. Concealed fastener panels can be installed via a snap-lock method or a mechanically seamed method.

Choosing the right panel system can be difficult. Luckily Metal Mart is there to help every step of the way. We can help you choose the panel system that best suits any application, budget and style.

NEED MORE HELP?

VISIT OUR WEBSITE & METAL MATTERS RESOURCE LIBRARY

Our website has information for all our panel products including slope and decking requirements, product information, manufacturer recommended installation as well as testing data, panel specific color charts and much more!

DOWNLOAD OUR RESIDENTIAL METAL ROOFING GUIDE

Metal Mart's Residential Metal Roofing Guide covers a wide variety of topics such as the advantages of metal roofing, material substrates, coating systems, warranties and common metal roofing myths.

FASTENER PATTERNS

ADDITIONAL FASTENER INFORMATION

Sealing material slightly visible at edge of metal washer. Assembly is weathertight.

Sealing material not visible. Not enough compression to seal properly.

Sealing material extruded beyond edge of washer.

TRIM & FLASHING

COLOR AVAILABILITY, DIMENSIONS, AND LEAD TIMES MAY VARY BASED ON LOCATION. CONTACT YOUR LOCAL METAL MART FOR DETAILS.

STANDARD PROFILES

CUSTOM PROFILES

Provide a drawing of your custom profile and we can bend trim to match your specifications.

Custom trim orders require drawings. When submitting a drawing, please be sure to include dimensions of each side, degrees or pitch of each bend and color side if applicable. Sample pieces of custom trim can often be requested to ensure a perfect fit for your project.

Metal Matters

NEED MORE HELP?

Different panel systems require different recommended trim installation. Visit our Metal Matters Resource Library for trim installation packets for each of our available panel systems, in-depth trim detail drawings, as well as helpful diagrams. Contact your local Metal Mart store for additional help with trim profiles or manufacturer recommended trim installation questions.

DIAGRAMS ARE INTENDED FOR DEMONSTRATION PURPOSES ONLY.

DOMESTIC SUBSTRUCTURAL

PRODUCT AVAILABILITY VARIES BY LOCATION.

NEED MORE HELP?

Many of our domestic steel products can be ordered as red-primed or galvanized. Standard gauge availability as well as web and flange sizes can be found on the domestic substructural page of our website or by scanning the QR code. Punch patterns are available for select domestic substructural members for an additional charge. Download standard punch patterns from our Metal Matters resource library. Section property tables are available for engineered domestic steel only. Other products and items may be available at select locations. Contact your local Metal Mart store for details.

IMPORT SUBSTRUCTURAL

PRODUCT AVAILABILITY VARIES BY LOCATION.

PRE-FABRICATED TRUSSES

Pre-fabricated Metal Mart trusses are available in 12' length with a 3/12 pitch or 20', 24', 30' and 40' lengths with a 2/12 or 3/12 pitch. Truss construction consists of a combination of square and rectangular tubing. Trusses are not engineered and as such cannot be guaranteed for structural applications. Recommended maximum bay spacing between trusses is 10'. For greater bay spacing and/or when engineering is required, please contact your local Metal Mart for a pre-engineered metal building quote.

NEED MORE HELP?

Other products and items may be available at select locations. Bundle quantities, minimum orders and/or additional fees may apply for special orders. Standard web and flange size availability can be found on the import substructural page of our website or by scanning the QR code. Contact your local Metal Mart store for additional information including availability, pricing and special orders.

HEAVY DUTY CARPORTS & COVERS

PROTECT YOUR ASSETS THE METAL MART WAY!

Metal Mart's heavy duty carport packages are designed with our DIY customers in mind. Featuring light gauge steel framing, these packages are easy to install using screw together or weld together connection points. Protect your vehicles from the harmful effects of sun, rain and hail. Available in a variety of colors and custom sizes, these carport packages have the ability to free-span up to 25' between columns! Square tubing posts, receivers or trusses, cee purlins, roofing panels and fasteners are included in every package. Trim packages can be added for an additional charge. We offer downloadable step-by-step design details for installation reference!

While these are not pre-engineered structures, they have provided excellent results in numerous applications for many years. Heavy duty carports from Metal Mart are a great option if you're looking for protection from an unrelenting summer sun or damaging hailstorms! These kits can help shield everything from a small lawnmower to a large vehicle or be walled in for livestock use! Metal Mart carports are a great addition to any property!

Metal Mart's Heavy Duty Carports are available in two styles: Single Slope (left) and Truss Style* (right).

*Truss Style carports are not available in all areas. Check with your local Metal Mart store for details.

READY FOR A QUOTE? LET US KNOW!

Fill out our Quote Request Form from our website to get a price from your local Metal Mart store today! Contact your local Metal Mart store for more details. Please note: Metal Mart is a material supply company only; any quoted package price does not include installation. Building standards vary by location; always check the building codes for your area before placing an order.

COMMERCIAL & RESIDENTIAL ROOFING

METAL ROOFING MADE EASY AT METAL MART!

Asphalt shingles have long dominated the residential roofing market, even though metal roofing has been a popular commercial roofing solution for decades. Metal roofing out-performs many other roofing options. With a life expectancy of up to 60 years, metal roofing could easily be the last roof you'll ever buy. Additionally, metal roofing can help cut down on energy costs, earn discounts on insurance premiums and increase your property's value with modern curb appeal. Metal Mart offers a wide variety of metal roofing systems to match and compliment any style. Installing a metal roof on your home or business is a great investment!

Metal Mart's exposed fastener systems are our most popular and economical option. Whether you are roofing a small dog house or your beautiful home, we have roofing panels to fit your style and budget, without compromising quality.

Concealed fastener systems from Metal Mart offer the best performance and improved appearance by concealing/hiding fastener points. Standing seam panels are available in snap-lock or mechanically seamed options.

Slit coil and flat sheets can be ordered for our contractor customers with their own roll-forming and/or trim bending equipment. We can help with reserving our portable production equipment when a job requires on-site panel production!

READY FOR A QUOTE? LET US KNOW!

Because each roof is unique, roof measurements are required for accurate quoting. Find Metal Mart's roofing measurement diagram and quote request forms on our website! It is the customer's responsibility to check all quotes for accuracy before placing an order. To get the best quality and life expectancy from a metal roof, it is recommended that you hire an experienced metal roofing contractor for roof measurements and installation. Always check references when hiring a contractor.

MONARCH BOLT-UP BUILDINGS

PRE-ENGINEERED METAL BUILDINGS FROM METAL MART!

Monarch pre-engineered metal buildings (PEMBs) feature pre-fabricated and pre-punched components consisting of red iron frames and substructural members for easy bolt together installation. These packages include everything you need to erect a metal building from the concrete plates to the top of the roof, including accessories needed to install all the various components. Concrete anchor bolt plans are also provided with the purchase of a building. Our default design standards for these buildings include clear-span rigid frames, flush wall girts and 26 gauge exposed fastener panels and trim. Monarch standard buildings (see below) are available with “Standard IBC”, “Snow IBC” and “High Wind IBC” design options to accommodate engineering and zoning requirements in your area. Contact your local Metal Mart store for the most up-to-date pricing and lead time information.

CHOOSE WHAT'S RIGHT FOR YOU			
STANDARD IBC	LIVE 20	SNOW 20	WIND 11E
SNOW IBC	LIVE 20	SNOW 30	WIND 13D
HIGH WIND IBC	LIVE 20	SNOW 10	WIND 15D

BUILDING FEATURES:

- 1/12 Roof Pitch
- Bolt together frame
- 8" Rigid frame straight columns combined with flush cee girts allow for flush walls ready to finish out.
- Welded clips on endwall connections
- No loose connection plates (except @door header)
- R-panel-pb 26 ga galvalume plus roof w/20 year warranty
- R-Panel 26 ga sil-poly painted walls w/30 year warranty
- STD Trim package (header, jamb, eave, base, o.c., gable and ridge cap)
- 1 framed opening centered on endwall (door not included)
- 40' x 60' x 16' has two framed openings (one in each endwall)
- Includes anchor bolt plans and full erection drawings

DOES NOT INCLUDE:

- Delivery to job site
- Anchor bolts
- Gutter and downspouts
- Roll-up doors, walk door, windows
- Insulation
- Engineering seal on drawings
- Items listed above can be added for an additional charge
- Erection

CODE AND LOAD

Buildings are designed to the building codes and loads listed. It is the responsibility of the customer to determine if the products supplied are in accordance with the building codes and loads required. Please contact your local permitting office for specific requirements.

BUILDING OCCUPANCY

This building is designed as risk Category II

NOTE: These are "KITS" intended to satisfy the fastest lead time requirements and to offer our most competitive price. Many other sizes and options are available. An Engineer's seal is also available on any building for an additional fee.

READY FOR A QUOTE? LET US KNOW!

Choose a Monarch Standard Building (above) or fill out a quote request form for a custom size! Monarch Standard Buildings are intended to satisfy the fastest lead time requirements and to offer our most competitive prices. Contact your local Metal Mart store for building design limits on custom buildings. Site delivery and engineer stamps can be added for additional charges. Always check with your local building authority to ensure proper coding, loads and engineer stamp requirements. Metal Mart does not install; price quotes do not include concrete, installation, or interior finishing.

COLD-FORMED METAL BUILDINGS

DESIGN A CUSTOM COLD-FORM BUILDING WITH METAL MART!

The metal building industry is changing! Traditional metal buildings have been around for decades and consist of red iron frames and red iron substructural members. Traditional frames are fabricated and welded together in a time and labor-consuming process. Fortunately, there is an alternative - Cold-Formed Buildings! Cold Formed Metal Buildings represent a great opportunity for both progressive contractors and building owners. Advantages range from end-user preference over conventional red-iron, non-welded frames to lower production man-hours, and ease of installation, which is important in today's tight labor market. Conventional metal buildings are notorious for long lead times due to the fabrication process. Cold Formed buildings are constructed entirely with roll-formed components, eliminating the need to fabricate and weld frames. The end-result is lower lead times!

Traditional pre-engineered metal building interior featuring heavy duty welded framing members.

Pre-engineered cold-form metal building interior featuring light gauge roll formed framing members.

Example of Cold-Form Building Frame Construction

READY FOR A QUOTE? LET US KNOW!

Our convenient design tool is another big difference between cold-form metal buildings and traditional metal buildings. Our convenient 3D design tool for cold-form metal buildings is available on our website! Begin by choosing your local Metal Mart store. The design tool allows you to edit the base design, building dimensions, color scheme, lean-tos, framed openings and bays. If you aren't computer savvy, your local Metal Mart is happy to help you design a building! Contact your local store for details.

BARNDOMINIUM/SHOUSE

GET THE BEST OF BOTH WORLDS WITH METAL MART!

Metal Mart has been selling metal home shells for over 30 years! Bardominium (barn + condominium) and shouse (shop + house) homes can provide both living quarters and shop or storage spaces. We can help you with the main structure that makes up the exterior shell of the home. These shells are energy efficient, faster to erect and being made of steel, provide greater strength and storm resistance than many other traditional home building methods. Featuring bolt-together or weld-up construction, these building shells are typically designed with clear-span framing to leave the interior of the shell open to accommodate any floor plan. In addition, the majority of the components are made in North America using up to 85% post-consumer recycled products!

If you aren't sure where to start, Metal Mart can help point you in the right direction to start your barndominium/shouse building journey! We can help you design your home shell to be stylish and attractive to keep up with today's modern curb appeal demands! Metal Mart offers one of the largest varieties of panel styles to suit any preference!

READY FOR A QUOTE? LET US KNOW!

Already have floor plans? Bring a copy to Metal Mart for building design reference. Bolt-up quote request forms are available to download on our website. Weld-up option is not available at all Metal Mart locations due to minimum building standards. Check with your local building authorities to ensure a bardominium/shouse is right for your area.

Metal Mart only provides the material for the exterior shell of the building. Quoted prices do not include concrete, installation or interior finishing. Metal Mart will make every effort to accommodate provided floor plans, however we reserve the right to refuse quoting based on building design.

SPECIAL ORDERS

Items in this catalog may not be in stock at all stores. Non-stock special orders require a down payment. Unpaid balance is due upon receipt of material. Due to space concerns, special orders not picked up within 30 days of certified mail notification will be sold and any monies on deposit will be forfeited. Metal Mart is not responsible for weather or storage damage on special orders not picked up within 5 days of receipt at our stores. Local building code compliance is the sole responsibility of the customer. Metal Mart makes every effort to comply with scheduled deliveries, but will not be held responsible for any loss or damages resulting from unforeseen delivery delays.

RETURN MERCHANDISE POLICY

Items may sometimes be returned within 30 days if it is in its original condition, accompanied by an original sales receipt, and its suitability for resale accepted by the store manager. There will be a restocking charge on all returns with the amount to be determined by the local store manager. Refunds over \$50 must be sent from our corporate accounting office. There are no returns on special trim.

WARRANTIES

Warrantied panels come with a 5, 25, 30 or 40 year limited finish warranty and a 45 or 50 year limited substrate warranty. Proper storage, handling and installation procedures must be followed. Failure to do so may void warranty. All non-warrantied panels are sold as is, with no warranty expressed or implied. No warranty claim will be processed without the original purchase invoice. Consult your local store manager for specific details.

TERMS

We are essentially a cash-and-carry business, however, we welcome Visa, MasterCard, American Express and Discover credit cards. Personalized checks, with proper identification, will be accepted from established customers. Checks in excess of certain amounts will have to be verified. No two-party or temporary checks will be accepted. Credit account applications are available from your local store manager. Prices and product specifications in this catalog are subject to change.

PACKAGING CHARGES

There will be a minimum charge of \$3.00 when a store bands your material. When more than three bands are used, each additional band required is \$1.00. If wood blocking is used, there will be an additional charge of \$1.00 per block. These charges will be waived on orders in excess of \$2,500.

COUNT DISCREPANCIES

Metal Mart personnel makes every effort to fill your order as accurately as possible, but the intricate nesting of panels and purlins can create occasional shortages and overages. We encourage every customer to double check our counts to verify accuracy. Once a load leaves our yard, the sale is final and there are no adjustments.

LOADING

Material loading is provided as a courtesy to our customers. Metal Mart is in no way responsible for the road worthiness of our customer's vehicles or trailers. Once material is loaded, it is your responsibility for transporting your purchase safely. Metal Mart does not tie down loads so bring your own tie downs.

PANEL SHEARING

Metal Mart uses a pneumatic panel cutter in most locations. These cutters are used to straight cut custom lengths from stock panels. Please allow 1/4" dimension tolerance when utilizing this service. Panels may be special ordered when closer length tolerances are required.

CONTRACTOR REFERRALS

Metal Mart is a supplier of materials only. Metal Mart does not engage in, nor is responsible for, the general contracting or proper installation of any materials. Metal Mart does not endorse or recommend specific contractors for installation, nor does Metal Mart guarantee the work of any person. Any contractor's name provided by Metal Mart is offered only as a convenience to our customers, and we strongly suggest checking references before selecting a contractor.

PRICE QUOTE & MATERIAL CALCULATIONS

Price quotes and material calculations are provided free of charge to our customers. Due to steel industry cost changes, pricing is subject to change without notice. It is customer's responsibility to verify calculated material quantities. Quotes are for materials listed and any additional materials needed are the customer's responsibility.

LIABILITY

Building standards vary by location. Customers should always check with their local building authorities to ensure that our products meet minimum building code requirements. Metal Mart cannot guarantee that any structure is built to withstand the additional weight of our material. It is the customer's responsibility to ensure that any Metal Mart product additions can be done in a safe and legal manner. Metal Mart is not liable for collateral damage, injury, coding specifications, including but not limited to occurrence from improper installation.

CONTACTING CORPORATE

Please fill out a "Contact Us" form on our website to be forwarded to the correct store, department, or supervisor for follow up.
